

HARPAC

About Us

Harpak Trading Company entered the global markets in the field of manufacturing all kinds of hospital beds many years ago, and strived to monitor the target market from the beginning in order to distinguish the real needs of customers and turn into one of the best brands in this new industry. After a while, this company managed to offer more medical equipment, due to the high potential in production and market needs. Harpak has managed to make a lot of progress in this field with the evolution and introduction of DC linear motors. Harpak Trading Company strives to emulate and approach the world's products in the hospital beds industry, by taking part in medical exhibitions. Harpak medical equipment has turned into one of the largest manufacturers in this field with the greatest variety in its products. We are proud to gain more share of the market with the support and trust of consumers in the Middle East.

Business Description

Advancements in science and technology as well as significant expansion of medical science to meet the needs and demands of people have all resulted in the alignment of medical science with the medical equipment as a complement that leads to achieving growth and development. Moreover, the significance of providing medical services for the comfort of patients in most communities has highlighted the role of medical equipment. Hospital beds, as the most widely used medical equipment, as well as direct contact with users, are of special importance in providing satisfaction and comfort to patients as well as medical staff.

Therefore, the need for durability and strength as well as ease of use is one of the most important specifications of this medical equipment. Harpak Trading Company has managed to design and produce various types of hospital beds with the best quality and facilities in order to meet the needs of all traders and merchants in the Middle East. Using advanced machines and experienced personnel, Harpak has turned into one of the largest manufacturers of hospital beds in the Middle East.

Vision and values

Harpak Trading Company intends to meet the needs of traders and merchants around the world in the near future by using the modern science as well as advanced machinery to develop their products in terms of quantity and quality. Harpak also intends to turn into one of the top three brands in the field of hospital beds in the world. Paying attention to the personnel in the workplace, organizational growth and education, reviewing consumer feedback, and paying attention to the environment are some of the values highlighted in this company.

Mission and Targets

Our mission at Harpak Trading Company is to produce high-quality products in order to gain the trust and satisfaction of costumers and maintain their health.

Targets:

- producing high-quality products
- Daily review of new technologies in the world and their use in the production
- Conducting research and development activities with the aim of presenting new products
- Strengthening the position of the organization as a reputable company and continuous efforts to gain more share of the global markets
- Paying attention to the needs and expectations of all company stakeholders

Message from the CEO

At Harpak Trading Company, we have completed a cohesive and focused collection of research in the field of production of hospital and clinic equipment from the very beginning, by absorbing and benefiting from the expertise of experienced staff. Harpak prioritizes the use of technology to have a more efficient and high-quality production. As improving the quality of any product is not possible without gaining customer's satisfaction, therefore, it is incumbent upon all the staff to work in line with this objective by the use of modern science, and observing global standards.

Delivery and Payment

Considering the fact that the Middle East provides access to a variety of transportation routes, including rail, sea, land and air, Harpak Trading Company exports its products to different countries easily, conveniently and promptly. Foreign customers can always discuss the issue with our experts if they need a certain route to transfer goods. Due to having multiple foreign currency accounts under the company name, and natural persons approved by the company, we suggest telegraphic transfer. You can also discuss your desired payment method with our experts.
